TESTIMONIAL

"...the feedback I am receiving from the patrol deputies is nothing but positive. They marvel at how easy it is to approach suspects undetected. The stealth qualities of this product are a great benefit when patrolling at night. Several of the persons contacted during the patrols were actually startled by the appearance of the deputies and stated that they never saw them coming. Tribred is also able to cover a lot of territory with ease. This tool has been a positive addition to our toolbox."
