Financing subject to credit approval. Payment based on minimum 10 units at a 36 month term with the first and last payment due in advance and a \$1.00 buyout. Taxes, maintenance, shipping charges and insurance not included.

BENEFITS OF FINANCING WITH CAPITAL INNOVATIONS

Match equipment benefits to cost: monthly payments allow you to use your equipment immediately.

- New equipment, with its operating efficiencies, pays for itself as you use it ... over time.
- Profits are generated by the use, rather than the ownership of equipment.
- The only initial cash outlay is the first and last advance payment.

Conserve cash and working capital: cash is not tied up in equipment.

- Money is available for opportunities, marketing, working capital or seasonal cash flow needs.

Preserve existing credit lines: existing lines of credit and borrowing availability are left untouched.

- Ready to use for operational and short-term financing needs.

Eliminate equipment obsolescence: regularly upgrade equipment.

- Avoid the inefficiencies of owning out-dated equipment.

100% financing: including soft costs (shipping, training and installation).

- Unlike a bank loan, there is no down payment or compensating balances required.

Overcome Budget Limitations: financing can fit the tightest of budgetary constraints.

Fixed monthly payment
